^{*}This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

	¬
L	B. Plywood/OSB roof sheathing with a minimum thickness of 7/16"inch attached to the roof truss/rafter (spaced a maximum of 24"inches o.c.) by 8d common nails spaced a maximum of 12" inches in the fieldOR- Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalen or greater resistance 8d nails spaced a maximum of 12 inches in the field or has a mean uplift resistance of a least 103 psf.
V	C. Plywood/OSB roof sheathing with a minimum thickness of 7/16"inch attached to the roof truss/rafter (spaced a maximum of 24"inches o.c.) by 8d common nails spaced a maximum of 6" inches in the fieldOR- Dimensiona lumber/Tongue & Groove decking with a minimum of 2 nails per board (or 1 nail per board if each board is equal to or less than 6 inches in width)OR- Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalent or greater resistance than 8d common nails spaced a maximum of 6 inches in the field or has a mean uplift resistance of at least 182 psf.
	D. Reinforced Concrete Roof Deck.
	E. Other:
	F. Unknown or unidentified.
	G. No attic access.
	Attachment: What is the <u>WEAKEST</u> roof to wall connection? (Do not include attachment of hip/valley jacks within nside or outside corner of the roof in determination of WEAKEST type)
	Toe Nails
	Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attached to the top plate of the wall, or
	☐ Metal connectors that do not meet the minimal conditions or requirements of B, C, or D
	Minimal conditions to qualify for categories B, C, or D. All visible metal connectors are:
	Secured to truss/rafter with a minimum of three (3) nails, and
/	Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion.
√ B.	Clips
	Metal connectors that do not wrap over the top of the truss/rafter, or
	☐ Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nai position requirements of C or D, but is secured with a minimum of 3 nails.
∐C.	Single Wraps Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.
□D.	Double Wraps
	Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, or either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side, or
	☐ Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, and is secured to the top plate with a minimum of three nails on each side.
	Structural Anchor bolts structurally connected or reinforced concrete roof. Other:
	als WS Property Address 1125-1127 STONEBROOKE LN LAKELAND 33803
* I his verification	on form is valid for un to five (5) years provided no material changes have been made to the structure or

wood shakes or wood shingles. -OR- Any system of screws, nails, adhesives, other deck fastening system or

truss/rafter spacing that has an equivalent mean uplift less than that required for Options B or C below.

^{*}This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

	Geometry: What is the roof shape? (Do not consider roofs of porches st structure over unenclosed space in the determination of roof perimental structure over unenclosed space in the determination of roof perimental structure.)						
	A. Hip Roof- Hip roof with no other roof shapes greater than 10 Total length of non-hip features: feet; Total						
	B. Flat Roof- Roof on a building with 5 or more units where at	least 90%	of the ma	in roof are	a has a	roof sloj	pe of
	less than 2:12. Roof area with slope less than 2:12 _		q ft; Tota	l roof area		sq	ft
	C. Other Roof- Any roof that does not qualify as either (A) or ((B) above.					
	dary Water Resistance (SWR): (standard underlayments or hot-mo		_	-			
s f B. N	SWR (also called Sealed Roof Deck) Self-adhering polymer modification or foam adhesive SWR barrier (not foamed-on insulation) approximate intrusion in the event of roof covering loss. American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996

Southern Standards Technical Document (SSTD) 12

OIR-B1-1802 (Rev. 01/12) Adopted by Rule 69O-170.0155

Qualified Inspector – I hold an active license as a: (check one)
Home inspector licensed under Section 468.8314, Florida Statutes who has completed the statutory number of hours of hurricane mitigation training approved by the Construction Industry Licensing Board and completion of a proficiency exam.
Building code inspector certified under Section 468.607, Florida Statutes.
General, building or residential contractor licensed under Section 489.111, Florida Statutes.
Professional engineer licensed under Section 471.015, Florida Statutes.
Professional architect licensed under Section 481.213, Florida Statutes.
Any other individual or entity recognized by the insurer as possessing the necessary qualifications to properly complete a uniform mitigation verification form pursuant to Section 627.711(2), Florida Statutes.
Individuals other than licensed contractors licensed under Section 489.111, Florida Statutes, or professional engineer licensed
under Section 471.015, Florida Statutes, must inspect the structures personally and not through employees or other persons. Licensees under s.471.015 or s.489.111 may authorize a direct employee who possesses the requisite skill, knowledge, and
experience to conduct a mitigation verification inspection.
I, <u>WILLIAM SEXTON</u> am a qualified inspector and I personally performed the inspection or (<i>licensed</i> (print name)
contractors and professional engineers only) I had my employee () perform the inspection
(print name of inspector) and I agree to be responsible for his/her work.
Qualified Inspector Signature:
An individual or entity who knowingly or through gross negligence provides a false or fraudulent mitigation verification form is
subject to investigation by the Florida Division of Insurance Fraud and may be subject to administrative action by the appropriate licensing agency or to criminal prosecution. (Section 627.711(4)-(7), Florida Statutes) The Qualified Inspector who
certifies this form shall be directly liable for the misconduct of employees as if the authorized mitigation inspector personally
performed the inspection.
Homeowner to complete: I certify that the named Qualified Inspector or his or her employee did perform an inspection of the
residence identified on this form and that proof of identification was provided to me or my Authorized Representative.
Signature: Date: 05/08/2023
An individual or entity who knowingly provides or utters a false or fraudulent mitigation verification form with the intent to obtain or receive a discount on an insurance premium to which the individual or entity is not entitled commits a misdemeanor of the first degree. (Section 627.711(7), Florida Statutes)
The definitions on this form are for inspection purposes only and cannot be used to certify any product or construction feature as offering protection from hurricanes.
